The 1986 Edition of the North Carolina Pesticide Report represents a revision of previous issues. By elaborating on the purpose of this report, by adding new material, and by better defining the substances listed, we attempted to reflect in a more meaningful manner the information collected during the 1986 calendar year. We hope that more readers will be able to use it more effectively and be able to understand how its use can facilitate the pesticide industry from manufacturer to consumer.

This will also acknowledge and express our appreciation to the following people who made significant contributions to the contents and preparation of this Pesticide Report: *Pesticide Section* - Jean G. How to Use This Report

Considerable time and effort has gone into editing and organizing this 1986 edition of the Pesticide Report. Every section has been updated, new information added as necessary, and details expanded to make this Report a more complete and up-to-date reference as to the sale and use of pesticides in North Carolina.

In this Pesticide Report you will find:

Introduction

The Introduction accurately reflects the development of laws and regulations governing the sale and use of pesticides in North Carolina.

It also refers to certain divisions in the North Carolina Department of Agriculture that perform key roles in regulating and controlling the sale and use of pesticides in this State.

Brief of the North Carolina Pesticide Law of 1971

This section presents a brief abstract of the North Carolina Pesticide Law of 1971. It also shows how and where to obtain a complete copy of the Law.

Regulations Adopted by the North Carolina Pesticide Board

This section presents verbatim all regulations adopted to date by the North Carolina Pesticide Board under the Administrative Procedures Act.

Pesticides Examined, 1986

This section presents in table form an alphabetical listing of the manufacturer of the pesticides that were sampled and analyzed in the Department's laboratories in 1986. Results of the analyses are tabulated and total numbers of each determination made are at the end of the table.

Samples at Variance From Guarantee, 1986

This table lists the samples found by the Department's laboratories to be at variance from guarantee in 1986. The table also lists the name of each manufacturer, each pesticide brand name, and presents data and a description indicating how each sample examined varied from guarantee.

Other Violations, 1986

This section gives the names of firms that manufactured or distributed products in North Carolina and had one or more violations under the North Carolina Pesticide Law of 1971. These violations constituted either unregistered or misbranded products examined at pesticide outlets but not sampled for analysis.

Summary of Regulatory Activities Performed Under the North Carolina Pesticide Law, 1986

This section presents a summary of the total numbers of manufacturers who registered pesticides in North Carolina; pesticide formulations registered; pesticides examined; stop-sale, stop-use, or removal orders issued; licenses issued; and equipment inspections.

Introduction

Pesticides cover a large number of materials and mixtures intended for destroying, controlling, or repelling pests such as insects, weeds, and other noxious plants, predatory animals and birds, soil-infesting pests such as nematodes, algae, snails, and bacteria. Other examples are disinfectants, antiseptics, and fungicides for use other than on living man or other animals, defoliants, various repellents, fly paper, and other adhesive products whose action goes beyond simple mechanics, moth proofers, wood preservatives other than common paints, mildew controls, and seed fumigants.

An adequate and readily available supply of many of these products is essential in the economical production of feed and fiber crops. The preservation of many products in storage and the control of domestic and industrial pests which affect both the health and welfare of human beings and animals are likewise dependent on such materials.

While the development and distribution of various pesticides to serve the needs are important, provisions must be present to protect the public. During the years 1947 through 1971, it was the purpose of the economic poisons law (North Carolina Insecticide, Fungicide, and Rodenticide Act of 1947, G.S. 4A, Chapter 106) to protect the public from adulterated, misbranded, worthless, and dangerous products, and legitimate manufacturers from unscrupulous competition.

During the years 1953 through 1971, the aerial application of pesticides was regulated by the North Carolina Aerial Crop Dusting Law, G.S. 4B, Chapter 106. The Law and the regulations promulgated thereunder, in summary, required the registration and licensing of contractors and aviators who engaged in the custom application of pesticides by aircraft in North Carolina. The validity of a license was further restricted to the period of time that coverage by liability bond or insurance for damage by aircraft was in force.

During 1969, the North Carolina General Assembly through House Resolution 1392 directed the Legislative Research Commission to study the laws regulating pesticides in N. C. and report its findings and recommendations to the 1971 General Assembly. As a result of the findings and recommendations of the Commission, the North Carolina Pesticide Law of 1971 was adopted.

The N. C. Pesticide Law of 1971 established the North Carolina Pesticide Board as the governing body for the programs of pesticide management and control set forth in the Law. Provisions for regulating the use, application (aerial and ground), sale, storage, disposal and registration of pesticides are set forth in the Law.

The Law provides for the adoption of a list of restricted-use pesticides and requires the licensing of all pesticide dealers who sell restricted-use pesticides directly to users. Pesticide applicators and consultants are also subject to licensing requirements.

The Commissioner of Agriculture is responsible for administering and enforcing the Law and all rules and regulations adopted by the Board.

Each brand or grade of pesticide must be registered with the North Carolina Department of Agriculture before it can be legally offered for sale in the State. A \$25.00 registration fee for each brand or grade must accompany each Application for Registration.

As under the economic poison law, a state-wide inspection service will be maintained for the collection of official samples of pesticides from dealers. Individual requests for inspections are also made. As authorized, additional pesticide samples will be taken at the user level as they are being applied to determine if they are being used in an approved manner. Samples of the commodity to which pesticides have been applied will also be taken when deemed appropriate.

Samples are sent to the Department's laboratories for analysis. Reports of analytical results are forwarded to manufacturers, dealers, and users. As a further means of reporting, the Pesticide Report covering a year's work as exemplified herewith, is published annually.

Restricted-Use
Pesticides

Any pesticide may be designated as a "restricted-use pesticide" upon the grounds that in the judgment of the Board it is so hazardous or injurious to persons, pollinating insects, animals, crops, wildlife, lands, or the environment that additional restrictions on its sale, purpose, use, or possession are required. Restricted-Use Pesticides include any pesticide required by the Environmental Protection Agency to bear the designation on its labeling "Restricted-Use Pesticide." (Restricted-Use Pesticides have been established by regulation.)

All pesticide dealers who sell restricted-use pesticides must be licensed. Application for a pesticide dealer's license must be accompanied by a fee of \$25. All licenses shall expire on December 31 of the year for which they are issued. The license may be renewed annually upon application to the Department of Agriculture, accompanied by a fee of \$25 for each license, on or before the first day of January of the calendar year for which the license is issued. Each applicant must demonstrate upon written, or written and oral, examination his knowledge of pesticides, their usefulness and their hazards; his competence as a pesticide dealer; and his knowledge of the laws and regulations governing the use and sale of pesticides.

Pesticide Dealer
Licensing Requirement

No person shall engage in the business of pesticide application within North Carolina unless he is licensed annually by the Board. Each license application shall be accompanied by a fee of \$25 for each applicator's license and an additional \$10 for each aircraft to be licensed. A pesticide applicator is defined as any person who owns or manages a pesticide application business which is engaged in the business of applying pesticides upon the lands or properties of another; any public operator; any private golf course operator; any seed treater; any person engaged in demonstration or research pest control; and any other person who acts as a pesticide applicator and is not exempt from this definition. It does not include:

Pesticide Applicator
Licensing Requirement

- a. Any person who uses or supervises the use of a pesticide (i) only for the purpose of producing an agricultural commodity on property owned or rented by him or his employer, or (ii) only (if applied without compensation other than trading of personal services between producers of agricultural commodities) on the property of another person, or (iii) only for the purposes set forth in (i) and (ii) above.
- b. Any person regulated by the North Carolina Structural Pest Control Law (G.S. Chapter 106, Article 4C.)

Each applicant must demonstrate upon written, or written and oral, examination his competence as a pesticide applicator or public operator.

No person shall perform services as a pest control consultant without first procuring from the Board a license. The application for a license shall be accompanied by an annual fee of \$25. A pest control consultant is defined as any person who, for a fee, offers or supplies technical advice, supervision, or aid, or recommends the use of specific pesticides for the purpose of controlling insects, plant diseases, weeds, and other pests, but does not include any person regulated by the North Carolina Structural Pest Control Act. Each applicant must demonstrate upon written, or written and oral, examination his competence as a pesticide consultant. However, the North Carolina Pesticide Board may waive the requirement for taking parts of the North Carolina consultant examination provided the applicant has a Ph.D., master's, or bachelor's degree in the discipline pertinent to the category for which a license is desired and provided the applicant has demonstrated successful completion of pertinent academic training or has passed a written or oral examination offered by another state or a professional organization. Applicants will be required to successfully complete written, or written and oral, examination(s) which demonstrates adequate knowledge of pertinent subject matter not specifically completed in academic training including knowledge of applicator state and federal pesticide laws and related subject matter.

Pest Control
Consultant
Licensing Requirement

No person shall handle, transport, store, display, or distribute pesticides in such a manner as to endanger man or his environment.

Handling, Storage, and
Disposal of Pesticides

Every pesticide prior to being distributed, sold, or offered for sale within this State or delivered for transportation or transported in intrastate commerce or between points within this State through any point outside this State shall be registered and such registration shall be renewed annually.

Registration

A registration fee of \$25 for each brand or grade of pesticide is required. An additional \$25 delinquent registration penalty shall be assessed against the registrant for each brand or grade of pesticide marketed in North Carolina prior to registration.

Registration Fee and
Delinquent Penalty

Registration is subject to refusal or cancellation for cause and upon hearing.

Refusal or
Cancellation of
Registration

A deficiency penalty of three times the percentage deficiency times the retail value of any product sold subsequent to sampling and prior to repossession, but not less than \$25 shall be assessed against any registrant of a pesticide found deficient in active ingredients.

Deficiencies

Any brand or grade found to be deficient or excessive in active ingredients, misbranded, adulterated, or not registered is subject to "Stop Sale, Stop Use Orders."

"Stop Sale, Stop
Use Orders"

The Pesticide Board may assess a civil penalty of not more than \$2,000 against any person who violates certain specifically enumerated provisions of this Law. In determining the amount of any penalty, the Board may consider the degree and extent of harm caused by the violation and the cost of rectifying the damage caused by the violation.

Civil
Penalties

Notwithstanding any other provision of this Law, the maximum penalty which may be assessed under this section against a "private pesticide applicator" is \$500 and such penalties may be assessed only for willful violations.

Any person who shall be adjudged to have violated any provision of the Law, or any regulation of the Board adopted pursuant to this Law, shall be guilty of a misdemeanor and for each violation shall be liable for a penalty of not less than \$100 or more than \$1,000 or shall be imprisoned for not more than 60 days, or both. In addition, if any person continues to violate or further violates any provision of this Article after written notice from the Board, the court may determine that each day during which the violation continued or is repeated constitutes a separate violation subject to the foregoing penalties.

Other
Penalties

NOTE: Copies of the North Carolina Pesticide Law of 1971 and additional copies of the regulations adopted by the North Carolina Pesticide Board may be obtained upon request to the Pesticide Section, North Carolina Department of Agriculture, P.O. Box 27647, Raleigh, North Carolina 27611.

SECTION .0400 - SAMPLES AND SUBMISSIONS

85.30

.0401 SAMPLES; SUBMISSIONS

85.32

(a) Personnel of the food and drug protection division are authorized and directed to sample, test, inspect, and make analysis of pesticides sold, offered for sale, distributed, or being applied within this state, at the time and place and to such an extent as is deemed necessary to determine whether such pesticides are in compliance with the provisions of the North Carolina Pesticide Law of 1971.

(b) An official analysis is made from the official sample. An official check sample is kept until an analysis has been made of the official sample. If the official sample analysis does not pass analysis, an official check sample is retained for 90 days in order to allow the registrant to obtain a portion of it for his own analysis, if he so chooses. Requests for portions should be made in writing to the Food and Drug Protection Division, North Carolina Department of Agriculture, Raleigh, North Carolina, 27611.

History Note: Statutory Authority G.S. 143-446; Eff. February 1, 1976; Amended Eff. August 1, 1982; January 27, 1978.

.0402 TOLERANCES

85.54

In regards to establishing tolerances providing for reasonable deviations from the guaranteed analysis statement, the following guidelines are adopted:

- (1) that, in general, a "passed" judgment on a pesticide formulation be made if the analytical results are within the following guidelines:

Pesticide Active Ingredient Guarantee, Percent	Allowable Deviation Below Guarantee	
1.00	15% of Guarantee	86.10
1.00 - 19.99	0.1 plus 5% of Guarantee	86.11
20.00 - 49.99	0.5 plus 3% of Guarantee	86.12
50.00 - 100.00	1.0 plus 2% of Guarantee	86.13

Additional considerations:

86.15

- (a) If a sufficient number of samples as determined by the food and drug protection division of a given product indicate that the manufacturer is not formulating the product to achieve the level of the guarantee, an administrative judgment may be made to warn the

formulator against the practice of formulating products in a manner only to stay within the allowable deviation from the guarantee.	86.22 86.23
(b) A sample result falling outside of the guidelines may not necessarily be "deficient" if one of the following factors could reasonably be expected to have contributed significantly to the off-limits analysis:	86.25 86.26 86.27
(i) special sampling problems, such as fertilizer-pesticide mixtures and certain granular products;	86.30 86.31
(ii) accuracy, specificity, reproducibility, etc., of the methods used when applied to the particular formulation;	86.33 86.34
(2) that, allowable deviations, similar to those for "deficiencies," are not applicable to "overages." Each sample analysis will be judged individually as to whether or not the overage is excessive by using the following criteria:	86.36 86.37 86.38 86.39
(a) no illegal residues resulting from use according to directions;	86.40 86.41
(b) no significant additional hazard to applicator or user;	86.42
(c) no significant damage to non-target organisms or the environment;	86.44 86.45
(d) stability of ingredients and the need for "over-formulating";	86.47
(e) accuracy, specificity, reproducibility, etc., of the methods used when applied to the particular formulation.	86.48 86.49
History Note: Statutory Authority G.S. 143-446;	86.52
Eff. February 1, 1976;	86.53
Amended Eff. August 1, 1982; January 27, 1978.	86.54
.0403 PESTICIDE SAMPLING PROCEDURES	86.56
(a) Procedures for sampling pesticides vary in accordance with the type of pesticide to be sampled and the type of sample to be taken.	87.2 87.3
(b) Pesticide samples are classified according to the following categories and procedures:	87.4 87.5
(1) "Formulation samples" must be taken from the manufacturer's original unopened container using clean sampling equipment so as to avoid any contamination. Judgments are based on tolerances for reasonable deviations from the guaranteed analysis statement.	87.6 87.7 87.8 87.9
(2) "Pesticide use samples" are obtained by division personnel who may sample pesticides from the consumer as it is being applied or during preparation for application. Judgments are made depending on the	87.10 87.11 87.12 87.13

AGRICULTURE - FOOD AND DRUG PROTECTION DIVISION

- directions for use contained on the registered pesticide label. 87.14
- (3) "Pesticide commodity samples" are obtained by division personnel who are authorized to sample commodities and submit them for analysis in order to determine whether properly registered pesticides have been applied according to label directions. 87.15 87.17 87.18 87.19
- (4) "Pesticide incident samples" are obtained by division personnel who are authorized to take samples, inspect, and investigate any incidents in which pesticides are reported or thought to be involved. 87.20 87.21 87.22 87.23

(11)	Public Water System	139.52
(a)	a system for the provision to the public of piped water for human consumption if such system has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least 60 days out of the year. Such term includes:	139.55 139.56 139.57
(i)	any collection, treatment, storage, and distribution facility under control of the operator of such system and used primarily in connection with such system; and	140.2 140.3

	History Note: Statutory Authority G.S. 143-463; 143-466; Eff. January 1, 1987.	140.21 140.22
	.2002 APPLICATION OF PESTICIDES THROUGH IRRIGATION SYSTEMS	140.24
(a)	These systems shall be fitted with effective antisiphon devices and a functional systems interlock that will prevent the backflow of pesticide or pesticide-water mixtures into water supplies or the backflow of water or pesticide-water mixtures into pesticide supplies during times of irrigation system failure or equipment shutdown. If a public water system is being utilized as the water source, the chemigation system shall not be connected directly to it. See requirements in Rule .2003 of this Section.	140.26 140.27 140.28 140.29 140.30 140.31 140.32 140.33
(b)	Pesticides shall not be injected into an irrigation system on the suction side of the irrigation pump.	140.35
(c)	Such safety devices or valves shall be installed between:	140.36

AGRICULTURE - FOOD AND DRUG PROTECTION DIVISION

T02: 09L .2000

(1) the irrigation system pump discharge and the point of pesticide injection into the irrigation system, and	140.38
(2) the point of pesticide injection into the irrigation system and the pesticide tank or container in accordance with Rule .2002(d).	140.39
(d) Such systems shall effectively meet the following criteria:	140.40
(1) double check valves shall be located between the irrigation pump discharge and the point of pesticide injection into the irrigation pipeline. These valves, when installed, shall be on a horizontal plane and level. A deviation of not more than 10 degrees from the horizontal shall be set.	140.41
(2) an inspection port shall be located between the irrigation pump discharge and the mainline check valves. In many cases, the vacuum relief valve connection can serve as the inspection port.	140.42
(3) a vacuum relief valve shall be located on the top of the horizontal irrigation pipeline between the discharge side of the irrigation pump and the inlet side of the double check valves. The vacuum relief valve shall have an orifice size of at least 3/4 inch for a 4-inch diameter irrigation pipe. The orifice size shall increase proportionally to an increase in irrigation pipe diameter.	140.44
(4) an automatic low pressure drain shall be located on the bottom of the horizontal irrigation pipeline between the discharge side of the irrigation pump and the inlet side of the double check valves. Such device shall be level and have an orifice size of at least 3/4 inch for a 4-inch diameter irrigation pipe. The orifice size shall increase proportionally to an increase in irrigation pipe diameter. The drain shall not extend beyond the inside surface or the bottom of the irrigation pipeline and shall be at least two inches above grade. The automatic low pressure drain shall discharge at least 20 feet from any water supply. The discharge from the drain shall be controlled to prevent the drainage from reentering the water supply.	140.45
(5) a flow interrupter device shall be located in the pesticide supply line between the pesticide injection unit and the pesticide supply tank or container. A normally closed solenoid-operated valve or other similar device is an acceptable method to positively prevent flow of pesticide or water in either direction during pesticide injection system failure or shutdown.	140.47

(7)	a functional systems interlock shall be provided. If interruption of the irrigation water flow occurs, the interlock must, at a minimum, cause the shutdown of the pesticide injection unit. If the irrigation pump and pesticide injection unit are at different sites, a low pressure cutoff, located near the point of pesticide injection into the irrigation system, could be electrically connected to the pesticide injection unit to provide for its shutdown in the event of low water pressure.	141.26 141.27 141.28 141.29 141.30 141.31 141.32

Official Analyses of Pesticides 1986

Definitions of Decisions

A summary of pesticides analyzed and the results of samples determined to be at variance from the guarantee are tabulated in the following pages. For the reader's ready interpretation of the report, those designations used are explained in the following paragraphs.

"PASSED" signifies that the labeling and composition of the product satisfactorily complied with guarantees and requirements.

"DEFICIENT" signifies that one or more ingredients fell significantly below the guarantee. Such products are placed under "Stop Sale Orders" and are removed from the market for reprocessing or relabeling. A deficiency penalty is also assessed against the manufacturer.

"EXCESSIVE ACTIVE INGREDIENT" indicates a significant excess of one or more active ingredients. Such formulations could be harmful to the user and/or result in excessive residues.

"ADULTERATED" indicates that quantities of undeclared active ingredients were present above established tolerances. Such lots, batches or brands are stopped from sale and other appropriate action taken.

"MISBRANDED" signifies that labeling failed to conform to requirements. Omission of some item or statement is a more common flaw. Among these may be proper ingredient listing, skull and crossbones, "Poison" in red and antidote where these are required; net contents by weight or volume; class of, and unsulfonated residues of petroleum oils; and percentages of alkaloids instead of crude product such as *sabadilla* seed.

In some instances of misbranding, the defect appeared to be inadvertent and of a minor nature. In others, removal from sale is necessary.

"NOT REGISTERED" signifies that the product was not registered at the time it was sampled. Any such product is required to be registered prior to release from "Stop Sale Order." A delinquent registration penalty is also assessed against the manufacturer.

As has been the practice in past work, analyses were made largely for those ingredients which were considered of major importance, as, for example, methyl parathion, whereas the related compounds were not checked. For sake of brevity, active ingredients not checked are not listed in Table II. This should not be taken to indicate that manufacturers did not include them on labels. This procedure has been followed because it enables a broader coverage of all products offered for sale.
